

Data Protection Information Sheet

Processing of personal data within the scope of consulting projects of Trovarit AG

We take responsibility

As part of your service project, you are most likely to entrust us with personal data of your employees and, if applicable, your business partners. The protection of this data is our highest priority!

For this reason, all our employees are regularly re-trained in the provisions of the European and German GDPR. In addition, we have of course taken comprehensive technical and organisational measures to prevent, for example, personal data from being lost, transferred to unauthorised third parties or used for other purposes.

If you provide us with personal data, we take responsibility for ensuring that this data is protected in accordance with the latest technical possibilities and is only processed in accordance with the statutory provisions!

Processing of personal data with the IT-Matchmaker®

This also and especially applies if personal data is processed with the IT-Matchmaker® within the scope of your project. Here too, we take comprehensive technical and organisational measures to protect personal data and largely agree the processing with you as the client.

In order to provide the services you have commissioned, we do not, however, act exclusively in accordance with instructions in the sense of the GDPR, but use our expertise and experience to achieve the best results for you. We process the data according to various procedures developed by us, enrich them with our own data, analyse the results and advise you on measures to be taken, etc.

It is therefore not a case of processing of personal data on behalf of a controller in accordance with Article 28 (3) of the EU General Data Protection Regulation (GDPR).

This eliminates the need to conclude a contract for data processing (data processing agreement) and you are not obliged to carry out the associated preliminary checks and controls of our data protection measures. This means that you are not solely responsible, but we do our part!

Nevertheless, we will of course provide you with an overview of our technical and organisational measures and, if necessary, we will be happy to support you in complying with the rights of the persons concerned.

Our internal data protection officer will be happy to answer any questions you may have at any time.

Claudia Benesch

Internal Data Protection Officer
